Commissioner of Patents and Trademarks

•	A. Barkan Na	Applicant/a
	Application No.	Applicant(s)
Office Action Summary	09/212,915	TAKASU, HIDEMI
	Examiner	Art Unit
The MAN INC DATE of this communication and	Michelle Estrada	2823
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status		
1) Responsive to communication(s) filed on 22 May 2001.		
2a) ☐ This action is FINAL . 2b) ☑ Th	is action is non-final.	
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4)⊠ Claim(s) <u>1 and 3-9</u> is/are pending in the application.		
4a) Of the above claim(s) is/are withdrawn from consideration.		
5) Claim(s) is/are allowed.		
6)⊠ Claim(s) <u>1 and 3-9</u> is/are rejected.		
7) Claim(s) is/are objected to.		
8) Claim(s) are subject to restriction and/or election requirement.		
Application Papers		
9) The specification is objected to by the Examiner.		
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).		
11)☐ The proposed drawing correction filed on is: a)☐ approved b)☐ disapproved by the Examiner.		
If approved, corrected drawings are required in reply to this Office action.		
12)☐ The oath or declaration is objected to by the Examiner.		
Priority under 35 U.S.C. §§ 119 and 120		
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).		
a) ☐ All b) ☐ Some * c) ☐ None of:		
 Certified copies of the priority documents have been received. 		
2. Certified copies of the priority documents have been received in Application No		
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 		
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).		
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.		
Attachment(s)		
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s)	5) Notice of Informa	ary (PTO-413) Paper No(s) Il Patent Application (PTO-152)
U.S. Patent and Trademark Office

Art Unit: 2823

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent 63-261833 (Japan '833) in combination with Wolf (Vol. 1).

Japan '833 discloses formation of a buried layer by implantation of either a p-type or an n-type conductive impurity through an opening in a patterned layer followed by annealing and formation of an epitaxial layer on the substrate surface, all in the same reactor furnace. The use of a photoresist layer or a patterned insulating layer as the implantation mask is disclosed to be entirely conventional by Wolf (Vol. 1, p. 322). The reference does not appear to anneal in an oxidizing atmosphere, and thus discloses annealing in a non-oxidizing atmosphere, because oxide formation and removal prior to epitaxial growth are not depicted. Heating of the substrate for some time period after the anneal step is in practice unavoidable when desiring to fully activate the implanted ions. Diffusion of the implanted impurities to expand the implanted region necessarily takes place during the anneal (Wolf, p. 307, third full paragraph). It also would have been within the scope of one of ordinary skill in the art to perform the epitaxial growth without cooling the wafer after annealing and diffusion of the implanted ions because

cooling of the wafer is not disclosed as necessary by Japan '833 and because the epitaxial growth temperature is higher than the annealing and diffusion temperature.

The examiner takes official notice that providing a cleaning gas such as H_2 or HCI to clean up the surface of the substrate was known at the time of the applicant's invention. It would have been within the scope of one of ordinary skill in the art to employ the known process for its known intended purpose to achieve the steps of the combination.

The choice of particular temperatures for the annealing/activation and epitaxial growth steps would have been a matter of routine optimization because temperatures for the steps are recognized as result effective variables. See MPEP 2144.05.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Estrada whose telephone number is 703-308-0729. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 703-308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 (7724, 3431 and 3432) for regular communications.
